Categorical Data

- Wow, I didn't realise that one hot encoded data can also be represented as vectors based on the present feature.

Linear to Logistic

- When performing Linear Regression on one hot encoded categorical data. Can I sort my predicted values as 0s and 1s based on if the values exceed or are below a set threshold ?
- Is the sigmoid function a control variable?

The Sigmoid

- Are there any statistical techniques to determine threshold placements ?

Log Loss

- Is log loss function a control variable

Minimizing Log Loss

- Would love to hear on how update rule is used for log loss functions

Multiclass

- What are the use case scenarios for one-vs-all (OVA) or one-versus-one (OVA)
