- **Bayes Rule**
    - Would appreciate further explanation on why Naive Bayes model does not optimise log loss functions like the other algorithm model.
- **Bayes Rule for MultiVariables**
    - Why does the naive part of the Naive Bayes model assume that all features are independent of each other?
- **Bayes Rule for Continuous Variables**
    - Can we use other distributions like the Poisson or exponential distribution for Naive Bayes ?
- **Naive Bayes and Logistic Regression**
    - Mention real world applications where the generative-discriminative pair from the Naive Bayes and Logistic Regression models are applied.
