Entropy:

- Please I would love more information on why log base 2 was chosen as the 'bits of entropy'?

Gini:

- How does Gini impurity handle multi-class classifications, the examples we have seen so far is 2-class classification?

Partition Trees

- How do we decide the boundaries for each partition tree, also how does the increase or decrease in boundaries affect the overall accuracy of a partition tree model ?

Bagging

- Is there a rule of thumb in the average amount of sub-model needed for bagging ?

Random Forest

- What are the applications whereby using a Random Forest might prove useful.
